

# The 21<sup>st</sup> International Conference on Screening for Lung Cancer

OCTOBER 24-25, 2009 - ZHUHAI, CHINA

Hosted by: The 5<sup>th</sup> Affiliated Hospital of Sun Yat-Sen University

The broadest mission of these Conferences is the collective pursuit of understanding the issues surrounding screening for lung cancer. The 21st Conference will focus on guidelines needed to implement screening and the usefulness of computer-assisted techniques critical to the regimen of screening. Attention will be directed to performance indicators to maximize the benefit and minimize potential harms of screening. Possible clinical trials for evaluation of treatment alternatives for the small-screen diagnosed lung cancer, including assessment of new surgical and nonsurgical technologies will also be discussed.
